

Cenveo Publisher Services' Mobile dPub™

Cenveo Publisher Services presents Mobile dPub™, a revolutionary e-delivery system that allows publishers to distribute content easily on any mobile device via a browser-flexible interface. Now you can electronically deliver a wide array of publications to all smart phones, computer tablets and computer desktops with a single link. Widen your scope by using Mobile dPub to distribute catalogs, journals, magazines, newsletters, event and meeting materials, training manuals and directories to your customers, members and partners.

Simple, fast and cost-effective, Mobile dPub transforms your print PDF into digital media allowing immediate access from any browser-capable device. Content can be securely delivered and managed through a subscription management tool with all of the revenue captured by the publisher. The tool provides for independent import of subscriber lists, subscriber management and payment processing. Mobile dPub allows customization of your presentation and supports rich media applications including video, pop-ups, web links, QR Codes and social media. The text only reading mode is ideal for reading on smaller screen devices and web analytics and reports are easily generated.

According to James McQueen, Director of Digital Media at Cenveo, "Mobile dPub is an ideal solution for interactive books, manuals and catalogs – allowing you to quickly and easily distribute content electronically to all existing and future browser-enabled mobile devices."

Add digital media to your traditional printed publications today with Cenveo Publisher Services' Mobile dPub to expand your reach and make it easier for your message to be heard.
