Cadmus Communications Extends Relationship with the American Physiological Society

Columbia, MD (February 25, 2010) – Cadmus Communications, a Cenveo Company, announced today that it has been awarded a four-year contract extension by the American Physiological Society (APS) to provide a full range of journal production services including composition, content management, and printing for all of APS' prestigious scholarly journals. APS is a nonprofit society devoted to fostering education, scientific research, and the dissemination of information in the physiological sciences.

The relationship between Cadmus and APS dates back decades and has been sustained by collaborative efforts to meet the publishing objectives of APS. Dr. Martin Frank, Executive Director of APS, stated, "APS is pleased to be able to continue its long standing relationship with Cadmus. We have always found Cadmus to be responsive to our needs, providing us with excellent service and the technology we need to advance our publications. Cadmus continually provides us with cost effective solutions for our business."

John Grinnell, Executive Vice President of Cadmus' Publisher Services Group, said, "We are excited and thrilled to extend our partnership with APS. Over the years, we have worked together to accomplish many of APS' publishing objectives including expediting time-to-market. Scientific publishing is changing everyday so we look forward to continuing the trend of working closely with APS and all of our customers to drive the changes in workflows and technology that are critical to meeting the needs of the scientific community."

###
