

Shortcut Your Authors Proofing Cycle

K N O W L E D G E W O R K S R A P I D P R O O F ™

Rapid Proof™ from Cadmus KnowledgeWorks gives scientific, technical and medical publishers a better way to deliver authors' proofs, using the power of the Internet. Rapid Proof lets you cut costs, shorten publication cycles, and put page proofs in front of your authors more quickly.

Deliver page proofs worldwide – immediately

Rapid Proof's robust web-based distribution eliminates the vagaries of email system incompatibility, lack of delivery verification or author travel schedules. You can cut the cost – and avoid the delays – of postal and courier transport.

The web-based Rapid Proof system lets you quickly access and download PDF images of page proofs anywhere in the world. Authors can mark up a downloaded and printed copy of the PDF file and return it by mail or by fax. Rapid Proof services combine the familiarity of paper-proof markups with the speed and cost benefits of the Internet.

This electronic proofing system is backed by experience

Since its introduction in July 2000, Cadmus KnowledgeWorks' Rapid Proof system has delivered page proofs for over 10,000 articles – in more than 120 journals – to scientists and scholars around the world. Authors in over 65 countries have received their article proofs electronically through this secure, web-based solution.

Authors use Rapid Proof through a familiar PDF interface

Authors need only a web browser and the Acrobat PDF Reader to use the Rapid Proof system. A free copy of the Acrobat Reader can be downloaded from several sites on the Internet.

Rapid Proof adapts to publishers' workflows

Publishers can use Rapid Proof services with no investment in hardware or software, because Cadmus

Rapid Proof services can slash the time required to distribute page proofs to authors and receive them back.

Rapid Proof at a glance:

- Reduce proof-cycle costs
- Reduce time-to-publication
- Deliver anywhere in the world – immediately
- Adapts to existing paper-based or electronic processes

KnowledgeWorks hosts and maintains the Rapid Proof application. The flexible Cadmus KnowledgeWorks workflow system lets Rapid Proof adapt to almost any publisher's processes, either paper-based or electronic. Publishers can customize the forms that accompany PDF proofs going to authors and the forms are merged with the article proofs into a single PDF file for ease of use. Publishers have a choice of water marking their proofs for security and protection.

Cadmus KnowledgeWorks supplies tools for scholarly publishing

Rapid Proof is part of Cadmus KnowledgeWorks' family of products and services for article-based digital workflow in scientific, technical and medical publishing. You can use Rapid Proof as a stand-alone
